Keo Chenda St., Chroy Jongva, Phnom Penh City

EDUCATION

Course Studied at

Secondary School/Kompong Kor Secondary School
2015 - 2018

Course Studied at

Hight School/Prek Brasab Hight School
2018 - 2021

Course Studied

University/Norton University
2022 - Present

SKILLS

- Figma & Adobe XD UI/UX
- Hosting
- Mobile / Web Development
- Catcut Video Creator
- Backend Server
- Process Flows

Chhorn Leanghor

Mobile Developer

WORK EXPERIENCE

Mobile Developer 2023 - Present

Rean Ai PLC | Sky Try Building, Phnom penh

As a mobile developer with expertise in Flutter. My experience includes integrating third-party APIs, implementing state management solutions like GetX, Provider and optimizing app performance for faster load times. I have a strong understanding of UI/UX principles and have worked on creating responsive, intuitive interfaces that enhance the user experience. Additionally, I have experience with backend integration, handling data persistence, and managing asynchronous operations for real-time functionality.

Figma UX/UI 2024 - Present

Rean Ai PLC | Sky Try Building, Phnom penh

I have experience working with designers in Figma to turn design mockups into functional Flutter apps. I collaborated with UI/UX teams to achieve pixel-perfect, responsive designs across different screen sizes. My role involved translating Figma components, animations, and interactions into Flutter widgets, creating smooth, user-friendly interfaces that stayed true to the original vision.

Full-Stack Developer

School Work at Norton University

In a university project, I worked in a team to build a full-stack application using Node.js for the backend, Vue.js for the frontend, and Flutter for mobile. My main contributions were developing backend APIs with Node.js, handling data storage and authentication, and working on real-time features. On the frontend, I helped implement interactive Vue.js components, and I used Flutter to create a cross-platform mobile app connected to the backend. The project involved teamwork, Git version control, and regular communication to meet deadlines. This experience strengthened my skills in full-stack development and collaboration.

Laravel Experience

School Work at Norton University

I have experience building systems with Laravel, where I developed backend features, managed databases, and created RESTful APIs. I worked on authentication, data validation, and efficient querying to ensure smooth application performance. This experience gave me a solid foundation in PHP, MVC architecture, and Laravel's powerful tools.

PROGRAM SKILL

Mobile Application

Flutter / Dart Programing
Java Android

Web Application

Vue.js
JavaScript
TypeScript
HTML
CSS
Bootstrap

BackEnd

Node.js
Laravel
